Staffordshire Police - Role Profile

Digital Forensics Media Technician

Grade/Rank:	Grade E
Directorate:	Investigations Directorate
Reports to:	Digital Forensics Media Supervisor
Direct Reports:	N/A

Role Purpose

Forensic science is used to support the investigation of crime. It can be used to provide evidence to support or refute an allegation, a version of events, and a person's involvement in an offence. The Forensics Department is committed to providing quality, objective, timely and effective forensic services to inform investigations, identify offenders, safeguard victims and witnesses, and streamline justice through good and early case management. This is achieved by:
- Designing and delivering effective forensic strategies for each and every case that we are involved in.
- Delivering all forensic examinations using recognised, validated and robust techniques
- Maintaining qualifications and competence to deliver techniques.
- Maintaining and following documented procedures that reflect best and validated practice.
- Being committed to and complying with the ISO/IEC 17025, 17020 and the Forensic Science Regulator's Codes of Practice and Conduct.

The primary purpose of this role is to deliver local forensic digital services including; CCTV, Mobile Devices; providing support to Officers and the Forensic Investigation Team.

Key Tasks and Responsibilities:

As a member of the Forensics team the post holder will have responsibility for delivering excellence in the field by:

- Complying with the Forensic Science Regulator's Code of conduct. Meet and maintain legislative and quality standards requirements as set out by both national guidance and the Forensic Science Regulator. This includes documenting procedures, competence assessments, peer review and audits to deliver a culture of continuous improvement.

- Being an integral part of the Forensic Investigation team, supporting the management and delivery of an operational caseload, working with police, police staff, external partners and other associated agencies on a day-to-day basis.
- A technical ability to extract digital data or analogue recorded images into a format that can be viewed for investigation and evidential use within the criminal justice system.
- Assessing and giving advice on the seizing of CCTV equipment.
- Producing evidential hard copy images from digital and analogue recording devices.
- Installing loan CCTV equipment where necessary.
- Perform a forensic examination process on mobile devices using semi automated techniques to recover, and examine data for analysis, investigation and other stakeholders e.g. lawyers and the judiciary.
- Preparing and presenting Digital findings in Streamlined Forensic Reports, Sec 9 Witness statements and to the Courts.
- Where specified meet required ISO 17025 quality standards.
- Reviewing colleagues work and findings within a defined quality management system.
- Advising and discussing Forensic Strategy in simple cases for investigating officers, on digital evidence recovery matters when appropriate.
- Viewing data that is sensitive to the security of the State or to the local community.
- Reviewing and ordering general equipment, hardware and software used by the Unit.
- Supporting the development of new digital techniques and procedures to improve service delivery.
- Conduct training development to support CPD and improving Digital Forensics.

And to be accountable for: (ie responsibilities held by others but measured and owned by this role)
